[Our E-Library contains full text articles and other resources related to the information below. Click here.](#)

? [WHY WE USE SYMBOLS/ICONS IN OUR LISTS.](#)

? **Please note:**

AFF does NOT maintain a list of "bad" groups or "cults." We nonjudgmentally list groups on which we have information.

Groups listed, described, or referred to on AFF's Web sites may be mainstream or nonmainstream, controversial or noncontroversial, religious or nonreligious, cult or not cult, harmful or benign.

We encourage inquirers to consider a variety of opinions, negative and positive, so that inquirers can make independent and informed judgments pertinent to their particular concerns.

Views expressed on our Web sites are those of the document's author(s) and are not necessarily shared, endorsed, or recommended by AFF or any of its directors, staff, or advisors.

See: [Definitional Issues Collection](#); [Understanding Groups Collection](#)

Finding Information on Groups – AFF E-Library

Group news and professional articles published since 1984 in AFF's periodicals are now available as electronic reprints and will soon be available in our E-Library, which initially will contain more than 4,500 articles and three books and eventually 5,000 to 10,000 news articles, as well as videos from AFF conferences. Here are the periodical article lists from which you can currently request reprints:

Cultic Studies Journal electronic reprints are available through our [bookstore](#) for \$3 each plus a \$2 handling charge.

Cult Observer and *Cultic Studies Review* electronic reprints are available for \$2 each (plus a \$2 handling charge).

Please send us a list of the specific reprints that interest you (copy and paste the title, volume, number, and year, if possible), e-mail, snail mail, fax, or phone in your credit card information (Visa or MasterCard only), or send a check (U.S. dollars drawn on a U.S. bank) payable to P.O. Box 2265, Bonita Springs, FL 34133. We are not bothering to set these up in our bookstore because we expect to have the E-Library functioning before we could complete such an arduous task. Once the E-Library is operational, you will be able to access everything on line.

As we develop the E-Library we are also updating this Web site by creating or upgrading HTML pages on specific groups. These pages (which are under development) will contain, when available, links pertinent to that specific group, links to relevant articles on the Web site, and lists of resources. Our developing group index appears at the bottom of these remarks.

Subscribers to our [free E-Newsletter](#) will be kept abreast of E-Library developments.

Caution

AFF provides information to help family members, helping professionals, former group members, and others understand the variety of interacting factors that cause different people to react differently to even powerful environments. News stories can provide useful background information to those seeking to understand group involvements. However, news reports don't usually provide a well-rounded or in-depth understanding of how a particular group functions, how individual personalities interact with a group environment, or what a concerned family member or friend can do to help somebody involved in a group that arouses concern. We urge inquirers not to rely solely on newspaper or magazine articles to evaluate group-related concerns.

The resources on our [bookstore](#) and the [study guides](#) on this Web site may help you better understand how to analyze and use information effectively in order to address family or personal difficulties.

Our [conferences and workshops](#) provide you with an opportunity to interact with experts, former group members, and family members. They can be invaluable learning experiences.
